APPLICATION OVERVIEW

Designed for High Traffic

With customizable options and material properties that fit the wear and tear of common areas, our tables perform in the most demanding applications and stay beautiful throughout years of high-traffic use. With a variety of materials, sizes and price points, Edgemold can build the right solution for every environment.

Hospitality

Hard Working Social Spaces

Today's savvy customers prefer to meet, gather, and work in public—changing the way the industry looks at common spaces. Edgemold offers sturdy, durable, and stylish table tops to suit every facet of the hospitality industry.

No Spill Edge Options provide convenient lip to contain messes.

Training

Cultivate Collaboration

Colleagues can meet and collaborate in style with Edgemold tabletops. Resistant to mold, bacteria, and scratches, Edgemold tables are perfect for high traffic environments like conference rooms and training centers.

Sloped Ergonomic Comfort Edge is designed for extended use, ideal for training environments.

Education

Surfaces for Today's Classroom

Edgemold tables are specifically designed to support different learning modes. Our customizable profiles, design options, and material choices encourage collaboration and help define personal work areas.

Stonewood Solid Phenolic tables are sleek, slim, self-edging and extremely durable—ideal for indoor, outdoor or damp environments.

The Seamless Design

improves table-top hygiene by eliminating a place for dirt, microbial growth, or moisture to accumulate.

Meeting

Dynamic Workspaces

Collaborative work is growing in popularity and as a result, meetings have become a fixture of the typical office work day. Edgemold tables cover the entire spectrum of meeting applications—from brainstorming sessions to boardroom conferences, workshops to quarterly reviews.

URETHANE EDGE ADVANTAGES

Seamless Design

Integrally molded Urethane Edges add beauty and unparalleled durability to any table surface. Edgemold's innovative urethane edges are completely sealed and seamless, eliminating a place for dirt, microbial growth or moisture to accumulate—making it the perfect solution for high traffic common spaces.

Unparalleled Tabletop Hygiene

Urethane edges are integrally molded and completely sealed to the core, eliminating a place for dirt, microbial growth, or moisture to accumulate vastly improving table top hygiene. Edges and surfaces withstand repeated sanitizing even with harsh agents, extending the life off your investment.

The popular semi-soft SRT edge profile adds comfort by removing sharp corners.

Urethane edges are extremely durable, impact and puncture resistant. Chair nicks—typical areas for microbial growth—are a thing of the past.

Progressive Color Selection

Edgemold offers 25 standard edge colors and a wide range of solid, woodgrain, and abstract surface options that complement every design style.

EDGE PROFILES

Being Prepared for Spills

Liquid spills are an inevitable part of high traffic environments. Our three No Spill edge options contain the mess for you—ensuring peace of mind and lasting durability. The practical design keeps liquids from dripping onto the floor and will also contain rolling pencils and other small solid objects.

Our XNS profile features a routed groove that is both practical and hygienic.

Custom Graphics

Improve your school spirit or corporate branding with custom graphics. Edgemold offers the in-house capability to add flair, bold colors, and logos to any surface. With digital printing, you don't have to order large quantities to get exactly what you want.

Because our graphics are thermally fused directly onto the surface using a high-resolution process, regular cleaning and sanitizing will not damage the surface in any way. The value of our internal capabilities is evident in our rapid turn-around, exceptional pricing, and consistent quality.

STONEWOOD TABLE SOLUTIONS

Stonewood Solid Phenolic

Stonewood solid tables are ideal for applications where strength, durability and appearance are paramount. With slim profiles of $\frac{5}{8}$ " and $\frac{3}{4}$ ", Stonewood surfaces boast sleek edges that flatter almost any design style. Machined from multiple sheets of thermally-fused kraft paper, the solid phenolic material is smooth, seamless, and requires no additional edge treatment that could trap food or bacteria.

Sleek and Seamless

Machined from solid phenolic, Stonewood tables are self-edging and eliminate the need for any applied edge treatments. Their seamless design improves tabletop hygiene by removing a place for dirt, microbial growth, or moisture to accumulate.

Self-edging solid phenolic eliminates applied edge treatments.

Optional protective UV layer for outdoor applications.

Versatile Durability

Moisture-resistance and high quality craftsmanship make Stonewood a versatile material for long-term use, surviving the most demanding environments in both outdoor and indoor applications.

What is Phenolic?

Using proprietary technology to thermally fuse resin-infused paper, Edgemold's solid phenolic tables boast unparalleled durability, UV resistance, and versatility.

Layers of kraft paper are coated in phenolic resin and a decorative layer is added.

The "paper sandwich" is fully-cured and thermally set.

Decorative Pattern

Balancing Backer

Phenolic Core

The result is a highly durable, nonporous surface with no seams.

Impervious to moisture, stains, scratches, bacteria and delamination

Play Along with Custom Graphics

Advertise your brand or add a board game by adding custom graphics that are thermally fused directly onto Stonewood table tops.

PVC SOLUTIONS

Clean 3mm PVC edge

Cost effective yet durable

Radius Corner

Available with square or 2" radius corners.

An Industry Standard

PVC edged tables are an industry standard. Using state-of-the-art banding equipment and quality materials, Edgemold offers a complete line of tables with the highest quality impact-resistant 3mm PVC edges
