

## Fiberesin's "Made In America" Production Supports COVID-19 Relief Loans Commitment

All of Fiberesin's product lines, including Stonewood Architectural Panels, are made in Oconomowoc, Wisconsin.

Paycheck Protection Program (PPP) and/or Economic Injury Disaster Loan (EIDL) recipients are **required to purchase American made products when possible.**

### Federal guidelines for PPP and EDIL

As construction projects around the country begin to resume in various capacities, businesses will be re-evaluating their supply chain for goods and services in order to move projects ahead.

For some, that will include moving forward with the assistance of the Paycheck Protection Program (PPP) and/or Economic Injury Disaster Loans (EIDL).

These loans have an **American Made** Commitment. Business owners utilizing these loans must certify that, "To the extent possible, [they] will purchase only American-made equipment and products."

Fiberesin would like you to know that **all of our products** are domestically produced in America's heartland. Because of the wide range of products we manufacture for the construction industry and the healthcare industry, Fiberesin is considered an "Essential Business" by the State of Wisconsin and has remained fully operational during the crisis. Most of our products are available at or below our standard quoted lead times.

### The American Advantage

What does domestic production mean for you? With our American-made commitment, Fiberesin and its brands, Stonewood Architectural Panels and Edgemold, are able to offer accelerated lead times, and exceptional customer service from a team of highly-trained essential workers who are here to guide you through unprecedented business demands. Customized orders, unique delivery requirements, specifications, engineering—our operations in Oconomowoc and Ashippun Wisconsin are able to offer solutions for every aspect of your project.

### Durable Against COVID-19 Sanitation

Our interior line of Stonewood (solid phenolic) products are **chemical-resistant** products. This means that they meet the Scientific Equipment and Furniture Association—**SEFA 8 Standard**—for chemical resistance/cleanability. These materials have immediate applications as a component or finished product in medical, laboratory, hospitality or food settings. **They can be**

**repeatedly cleaned and sanitized against Covid-19 with all approved disinfectants and sanitizers as outlined by the CDC.**

### **Ready For Mobilization**

Fiberesin Industries' product lines including Stonewood Architectural Panels, Edgemold tables and Stonewood components, are ready for immediate mobilization and delivery to ensure your project is completed. Contact us with your drawings and specifications. The products are made-to-order in Wisconsin, with average lead time 3-5 weeks. Accelerated lead times for Covid-19 essential goods are available upon request, please contact us.

### **Daily Operations**

As always, we are committed to the health and safety of our staff and customers. We continue to maintain the highest product and manufacturing sanitation measures, as well as staying in full compliance with the guidelines outlined by the State of Wisconsin for essential businesses operations. The safety of our workers remains our top priority.
